

## Quality Policy Statement

The goal of SITech, Ltd. Company is to provide high-quality software and services, which perfectly meet the requirements of our Customers, and even exceed expectations.

Our extended and successful experience of the IT market presence indicates that Customers require software products and services of the top quality level at reasonable costs. And we are taking the responsibility to provide such products and services. We have been trying to be exacting to ourselves in both production and rendering of services. We believe this way leads us to securing stable positions of SITech on the market.

Continuous improvement of software quality is the basic strategy for our business development and success.

In order to reach the goals of our Quality Policy, we are working:

- To introduce an effective Quality Management System, which meets the requirements of ISO 9001 International Standard;
- To control and improve continuously the business processes including production and interaction with the Customers;
- To introduce new equipment and technologies, which meet the Customers' requirements;
- To involve the personnel in the process of Quality Management;
- To raise the level of personnel and management proficiency continuously.

We state that Quality Management is not a short-term campaign, but a steady commitment of SITech, Ltd.

SITech Leadership assume the responsibility for the Quality Policy realization and arrangement of necessary conditions for that including resources required.

Chief Executive Officer  
Igor E. Romadanov
