SITECH

Samara Information Technology (SITECH) is a software development company providing state-of-the-art solutions to a wide range of industries. SITECH combines fundamental research activity with practical applications in software development, re-engineering, support and maintenance.

We offer the best expertise in:

- Content Management Solutions for global Networks and Intranet
- Database Programming around Royalty Tracking
- Multimedia stream over the Web/E-Learning applications

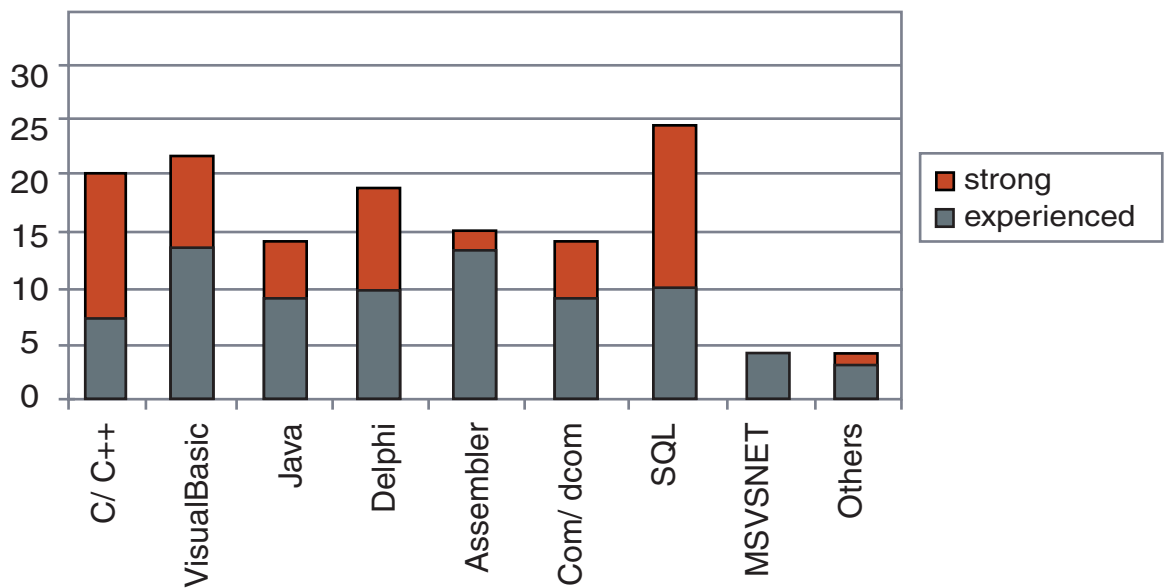

Benefits of working with SITECH:

Since 1998, SITECH has enjoyed a very close relationship with its partners River Logic, Inc., a developer of decision support applications for industry, and EBSCO Publishing, a leading provider of electronic databases for libraries, schools, corporations and consumers worldwide. In collaboration with managers and experts at River Logic, Inc., and EBSCO Publishing SITECH has created several unique award-winning software products and gained very valuable experience in remote software application and product development. Our past project successes have been based not only on the depth of our technical expertise, but also on our strength in software project planning and project management. Today we are proud of SITECH's widely known reputation as a reliable and trusted partner in the industry.
